

Event Report

Date of the event	14/6/2016 – 18/6/2016 (5 days)
Title of the Event	Advanced Technologies and New generation materials in Chemical Engineering: Faculty Development Programme

MVJ College of Engineering, Department of Chemical Engineering, organized a Faculty Development Program on “Advanced technology and New Generation materials in Chemical Engineering” from 14/6/2016 to 18/4/2016. The FDP is a major initiative for strengthening the country's intellectual infrastructure for chemical engineering, Chemistry, Physics, in education and training, through the Faculty Development Programmes (FDP).The programme broadly focuses on enhancing functional area expertise, improving one's classroom performance in latest subjects and enriching the abilities for conducting meaningful research. The FDP is planning to focus on the latest technologies and systems in the field of chemical engineering, Chemistry and Physics. New application software available for study, design and analysis to be included as hands on training for faculties. The FDP is proposed to focus on smart materials with industry perspective. New design and structural developments in chemical reactors and distillation columns, like divided wall columns, micro-reactor to be proposed to include for the study in FDP. The FDP proposed yet another filed of research and concern for the society which is the green technology evolution and alternate energy resources.

Following eminent faculties talked on the faculty development programme

Dr . Saravanan, Deputy Director , CPRI, Bangalore
Dr . Madhuchandr a Maiti, Global Research Centre,
Apollo Tyres, Bangalore
Dr . Panda, Sr . Scientist, NAL, Bangalore
Dr . Nagaraju, Professor , St. Joseph College, Bangalore
Dr . Ganapathy Ayappa, Professor, IISc, Bangalore
Mr. Ahil George, Sr. Executive, Honeywell, Bangalore
Dr . Ashok Menon, Vice President, Sabic , Bangalore

The Department of Chemical Engineering organised an industrial visit exclusively for faculties to Yokogawa India Ltd.
