## **Department of Computer Science and Engineering**

### **Event Title: "Git and Github Workshop"**

The Department of Computer Science Engineering organized a Workshop event titled "Git and Github" Workshop was conducted on 14th May 2026 at 9:00 AM in Seminar Hall-02. The event was organised by the AWS Student Builder Group (AWS SBG) technical club to introduce students to version control and collaborative software development using Git and GitHub. The workshop helped students learn how to manage code, track project changes, work in teams, create repositories, use branches, commit changes, and contribute to projects efficiently. It also aimed to build practical skills required for real-world development and open-source collaboration. The workshop provided both theoretical understanding and hands-on exposure to participants. A total of 100 participants attended and actively engaged throughout the session.

#### Objective of the Event

- To familiarise participants with Git and GitHub and their real-world applications in software development and collaboration.
- To develop skills in version control, repository management, branching, committing changes, and collaborative project handling using Git and GitHub.
- It also focused on enhancing students' ability to manage projects efficiently, contribute to open-source projects, and work effectively in team-based development environments.

#### Event Overview

The Git and GitHub Workshop was conducted on 14th May 2026 at 9:00 AM in Seminar Hall – 02. The event was organised by the AWS Student Builder Group (AWS SBG) technical club to introduce students to Git and GitHub, essential tools for version control, project management, and collaborative software development. The workshop provided both theoretical understanding and hands-on exposure to participants. A total of 100 participants attended and actively engaged throughout the session.
