

POWER BI STTP

The department of **ISE** conducted an **STTP** titled **POWER BI** on **13-09-2025** at **9:30 am to 3:30 pm**, in **Seminar Hall 4**.

The event featured an informative session led by a guest speaker who introduced the participants to the fundamentals and practical applications of Power BI. The session witnessed enthusiastic participation from students, who actively engaged in hands-on activities and showcased their analytical skills with great energy. Their participation made the session highly interactive and dynamic. In general, the program was informative and enjoyable, offering students a valuable learning experience. It significantly boosted their confidence and provided meaningful exposure to data visualisation tools, preparing them for future internships and job interviews in data-driven roles.

Objectives of the Event

The primary objectives of the event were:

- Introduce students to Power BI and its practical applications in data analysis and visualisation.
- Expose students to industry-relevant tools, preparing them for roles in data analytics and reporting.
- Provide hands-on experience with real-world datasets and dashboard creation.
- Share methodologies for assembling BI teams, conducting assessments, and defining focus areas to ensure successful Power BI adoption.
- Provide practical training on data import, transformation, visualisation, and dashboard creation using Power BI.
- Equip students with in-demand skills that are valuable in roles such as data analyst, BI developer

Event Overview

The session commenced at 9:30 am with a welcome address by Vasudev K and Ananya Bera, followed by an engaging session by Sreekala K and Sinish Gopi, Senior Power BI Analyst.

Day	Time	Session Details
Saturday, September 13 2025	9.30 - 10 am	Welcome Address
	10 - 12.30 pm	Seminar
	1.30 - 3.30 pm	Hands-on, Quiz

Table 1: Schedule of the Event

Outcomes and Impact

- Students gained hands-on experience with Power BI, enhancing their data visualisation and analytical skills.
- Participants developed a better understanding of real-world applications of business intelligence tools.
- Exposure to industry-relevant practices bridged the gap between academic learning and professional expectations.

Conclusions

The Power BI STTP event was a resounding success, marked by enthusiastic student participation and hands-on learning. It provided valuable exposure to data visualisation tools, strengthened analytical thinking, and built confidence in using Power BI for real-world applications. The event effectively met its objectives by bridging academic knowledge with industry-relevant skills, preparing students for future internships and job opportunities.
